Board of Trustees
Georgia Firefighters' Pension Fund
2171 East View Parkway
Conyers, GA 30013-5756

Dear Members of the Board:

We are pleased to submit herewith the results of the annual actuarial valuation of the Georgia Firefighters' Pension Fund (Fund) prepared as of June 30, 2022. The purpose of this report is to provide a summary of the funded status of the Fund as of June 30, 2022 and to recommend an Actuarially Determined Employer Contribution (ADEC) for the fiscal year ending June 30, 2023. The information needed for the Fund under the Governmental Accounting Standards Board Statements No. 67 and 68 will be provided in separate reports. However, for informational purposes only, we have also provided accounting disclosure information in Section VI of the report. While not verifying the data at source, the actuary performed tests for consistency and reasonability.

On the basis of the valuation, the ADEC is \$40,342,307 for the fiscal year ending June 30, 2023. This is an increase of \$6,419,654 from the ADEC for the fiscal year ending June 30, 2022 determined in the previous year's valuation report. This contribution is sufficient to meet the minimum funding requirements under Title 47, Chapter 7 of the Official Code of Georgia.

The promised benefits of the Fund are included in the actuarially calculated contributions which are developed using the entry age cost method. A five-year smoothed market value of plan assets was used for the actuarial value of assets. In accordance with the funding policy adopted by the Board, the remaining balances as of June 30, 2021 of the Transitional UAAL and each New Incremental UAAL from 2015 through 2021 is being amortized over a closed 23-year period beginning with the June 30, 2022 valuation. Gains and losses in subsequent years are amortized within a closed 25-year period from the valuation it is established. The assumptions recommended by the actuary and adopted by the Board are reasonably related to the experience under the Fund and to reasonable expectations of anticipated experience under the Fund.

Since the previous valuation, several economic and demographic assumptions and actuarial methods have been revised to reflect the results of the experience investigation for the six-year period ending June 30, 2021. Also, two Cost-of-Living Adjustments (COLA) of 1.5% and 1.0% were granted to retired members and beneficiaries and to the benefit rate of future retirees effective as of January 1, 2022 and July 1, 2022, respectively.

Board of Trustees
November 4, 2022
Page 2

This is to certify that the independent consulting actuary is a Member of the American Academy of Actuaries and has experience in performing valuations for public retirement funds, that the valuation was prepared in accordance with principles of practice prescribed by the Actuarial Standards Board, and that the actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the Fund and on actuarial assumptions that are internally consistent and reasonably based on the actual experience of the Fund.

The employer contributions to the Fund are based on premium tax revenues. Assuming that the premium tax revenues to the Fund are made from year to year in the future at an amount that equals or exceeds the ADEC determined in successive actuarial valuations, the continued sufficiency of the retirement fund to provide the benefits called for under the Fund may be safely anticipated.

Future actuarial results may differ significantly from the current results presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Since the potential impact of such factors is outside the scope of a normal annual actuarial valuation, an analysis of the range of results is not presented herein.

In order to prepare the results in this report, we have utilized actuarial models that were developed to measure liabilities and develop actuarial costs. These models include tools that we have produced and tested, along with commercially available valuation software that we have reviewed to confirm the appropriateness and accuracy of the output. In utilizing, these models, we develop and use input parameters and assumptions about future contingent events along with recognized actuarial approaches to develop the needed results.

This actuarial valuation was performed to determine the adequacy of statutory contributions to fund the plan. The asset values used to determine unfunded liabilities and funded ratios are not market values but less volatile market related values. A smoothing technique is applied to market values to determine the market related values. The unfunded liability amounts and funded ratios using the market value of assets would be different. The interest rate used for determining liabilities is based on the expected return on assets. Therefore, liability amounts in this report cannot be used to assess a settlement of the obligation.

The actuarial calculations were performed by qualified actuaries according to generally accepted actuarial procedures and methods. The calculations are based on the current provisions of the system, and on actuarial assumptions that are, in the aggregate, internally consistent and reasonably based on the actual experience of the system.

Section I – Summary of Principal Results

**GEORGIA FIREFIGHTERS' PENSION FUND
REPORT OF THE ACTUARY
ON THE VALUATION
PREPARED AS OF JUNE 30, 2022**

1. For convenience of reference, the principal results of the current and preceding valuations are summarized below.

Valuation Date	June 30, 2022	June 30, 2021
Active members:		
Number	13,484	13,698
Retired members and beneficiaries:		
Number	6,728	6,421
Annual allowances	\$ 63,745,032	\$ 59,299,548
Number of terminated vested members	410	360
Actuarial Accrued Liability	\$ 1,357,734,522	\$ 1,242,368,882
Assets:		
Market Value	\$ 1,055,714,633	\$ 1,202,263,485
Actuarial Value	1,098,687,874	1,045,113,412
Unfunded Actuarial Accrued Liability	\$ 259,046,648	\$ 197,255,470
Blended Amortization Period	23.5 years	23.7 years
Actuarial Value Funded Ratio	80.9%	84.1%
Market Value Funded Ratio	77.8%	96.8%
Fiscal Year Ending	June 30, 2023	June 30, 2022
Actuarially Determined Employer Contribution (ADEC):		
Employer Normal Cost*	\$ 19,960,643	\$ 18,471,056
Actuarial Accrued Liability	20,381,664	15,451,597
Total	\$ 40,342,307	\$ 33,922,653

* Includes an amount for administrative expenses beginning in the June 30, 2022 valuation.

Section I – Summary of Principal Results

2. The major benefit and contribution provisions of the Fund as reflected in the valuation are summarized in Schedule F. Two Cost-of-Living Adjustments (COLA) of 1.5% and 1.0% were granted to retired members and beneficiaries and to the benefit rate of future retirees effective as of January 1, 2022 and July 1, 2022, respectively. These changes increased the actuarial accrued liability by approximately \$31.7 million.
3. Schedule D of this report outlines the full set of actuarial assumptions and methods used in the valuation. Since the previous valuation, various assumptions and methods have been revised to reflect the results of the experience investigation for the five-year period ending June 30, 2021. The changes in assumptions increased the actuarial accrued liability by approximately \$59.8 million. These revised assumptions were adopted by the Board on September 20, 2022 and are summarized below.

Summary of Assumptions and Methods	
<i>Economic Assumptions</i>	
Price Inflation	Lowered assumption from 2.75% to 2.50%.
<i>Demographic Assumptions</i>	
Mortality	Changed to the Pub-2010 Public Safety table, with no adjustments, projected generationally with the MP-2021 scale.
Retirement	Changed assumed rates to better match experience
Withdrawal	Changed assumed rates to better match experience
<i>Other Actuarial Methods and Assumptions</i>	
Administrative Expenses	An amount of \$1,850,000 to be added to the employer's normal cost portion of the ADEC for administrative expenses.
Amortization Method	The remaining balances as of June 30, 2021 of the Transitional UAAL and each New Incremental UAAL from 2015 through 2021 is being amortized over a closed 23-year period beginning with the June 30, 2022 valuation. Gains and losses in subsequent years are amortized within a closed 25-year period from the valuation it is established.

Section I – Summary of Principal Results

4. The entry age actuarial cost method was used to prepare the valuation. Schedule E contains a brief description of the actuarial cost method.
5. Comments on the valuation results as of June 30, 2022 are given in Section IV and further discussion of the contributions is set out in Section V.
6. As shown in the Summary of Principal Results, the funded ratio is the ratio of actuarial value of assets to the accrued liability and is different based on market value of assets. The funded ratio is an indication of progress in funding the promised benefits. Since the ratio is less than 100%, there is a need for additional contributions toward payment of the unfunded accrued liability. In addition, this funded ratio does not have any relationship to measuring sufficiency if the plan had to settle its liabilities.

Section II – Membership Data

1. Data regarding the membership of the Fund for use as a basis of the valuation were furnished by staff. The valuation included 13,484 active members, which is a decrease from last year's active count of approximately 1.56%.
2. The following table shows the number of retired members and beneficiaries as of June 30, 2022 together with the amount of their annual retirement benefits payable under the Fund as of that date.

**THE NUMBER AND ANNUAL BENEFITS OF
RETIRED MEMBERS AND BENEFICIARIES
AS OF JUNE 30, 2022**

GROUP	NUMBER*	ANNUAL RETIREMENT BENEFITS
Service Retirements	6,090	\$ 58,239,540
Disability Retirements	19	153,900
Beneficiaries of Deceased Members	<u>619</u>	<u>5,351,592</u>
Total	6,728	\$ 63,745,032

* In addition, there are 410 terminated members entitled to deferred vested benefits and 2,953 inactive members due a refund of their employee contributions.

3. Table 1 of Schedule I shows the status reconciliation since the last valuation. Table 2 of Schedule I shows the distribution by age and years of membership service of the number of active members included in the valuation. Table 3 of Schedule I shows the number and annual benefits of retired members and beneficiaries included in the valuation, distributed by age.

Section III – Assets

1. As of June 30, 2022, the total market value of assets amounted to \$1,055,714,633, as reported by staff. The estimated net investment return, on a market value basis, for the plan year was (11.12)%. Schedule C shows the receipts and disbursements of the Fund for the year preceding the valuation date and a reconciliation of the Fund balances at market value.
2. The actuarial-related actuarial value of assets using a five-year smoothing technique of investment gains and losses is \$1,098,687,874. The estimated investment return for the plan year ending June 30, 2022 on an actuarial value of assets basis was 6.46%, which can be compared to the investment return assumed for the period of 5.75%. This investment experience resulted in a gain in the unfunded actuarial accrued liability of approximately \$7.4 million. Schedule B shows the development of the actuarial value of assets as of June 30, 2022.

Section IV – Comments on Valuation

1. Schedule A of this report contains the valuation balance sheet which shows the present and prospective assets and liabilities of the Fund as of June 30, 2022. The valuation was prepared in accordance with the actuarial assumptions set forth in Schedule D and the actuarial cost method which is described in Schedule E.
2. The valuation balance sheet shows that the Fund has total prospective liabilities of \$1,513,031,173 of which \$784,056,990 is for the prospective benefits payable on account of present retired members, beneficiaries of deceased members, terminated members entitled to deferred benefits, and inactive members entitled to a refund of their employee contributions, and \$728,974,183 is for the prospective benefits payable on account of present active members. Against these liabilities, the Fund has a total present actuarial value of assets of \$1,098,687,874 as of June 30, 2022. The difference of \$414,343,299 between the total liabilities and the total present assets represents the present value of future contributions.
3. The contributions to the Fund consist of normal contributions and actuarial accrued liability contributions. The valuation indicates that normal contributions of \$23,727,341 are required to provide the currently accruing benefits of the Fund. Of this amount, \$3,766,698 is expected to be paid by the members and the remaining \$19,960,643 is required by the Fund.
4. Prospective normal contributions have a present value of \$155,296,651. When this amount is subtracted from \$414,343,299 which is the present value of the future contributions to be made, there remains \$259,046,648 as the amount of unfunded actuarial accrued liability contributions.

Section IV – Comments on Valuation

5. Since the previous valuation, the funding policy has been updated by the Board, as shown in Schedule G, and provides that the remaining balances as of June 30, 2021 of the Transitional UAAL and each New Incremental UAAL from 2015 through 2021 will be amortized as a level dollar amount over a closed 23-year period beginning with the June 30, 2022 valuation. Each New Incremental UAAL from the June 30, 2022 valuation will be amortized as a level dollar amount over a closed 25-year period from the date it is established.
6. The funding policy also states that the required contribution amount determined in an actuarial valuation will be sufficient to satisfy the normal cost of the Fund and amortize the UAAL as a level dollar amount over a period not to exceed 25 years (for the UAAL as of the June 30, 2014 valuation and for each successive year of gains and losses incurred following the June 30, 2014 valuation).
7. We have determined that an actuarial accrued liability contribution amount of \$20,381,664 will comply with the Board's funding policy.
8. The following table shows the components of the total UAAL and the derivation of the UAAL contribution rate in accordance with the funding policy:

TOTAL UAAL AND UAAL CONTRIBUTION RATE

	Initial Amount	UAAL as of June 30, 2022	Amortization Period (years)	Amortization Payment (5.75%)
Transitional	\$168,678,888	\$147,618,162	23	\$11,730,436
New Incremental 6/30/2015	20,214,603	18,056,034	23	1,434,818
New Incremental 6/30/2016	10,801,257	9,841,724	23	782,070
New Incremental 6/30/2017	(12,816,398)	(11,894,872)	23	(945,223)
New Incremental 6/30/2018	13,221,735	12,482,289	23	991,902
New Incremental 6/30/2019	345,471	331,357	23	26,331
New Incremental 6/30/2020	6,533,831	6,359,814	23	505,381
New Incremental 6/30/2021	10,490,195	10,351,554	23	822,583
New Incremental 6/30/2022	65,900,586	<u>65,900,586</u>	25	<u>5,033,366</u>
Total UAAL		\$259,046,648		\$20,381,664
Blended Amortization Period				23.5 years

Section IV – Comments on Valuation

9. Overall, there was a \$65.9 million net loss in the UAAL for the 2022 valuation. The primary contributor to the net loss was the change in assumptions resulting in a \$59.8 million loss. A secondary contributor was the impact from granting the 1.5% and 1.0% COLA increases which resulted in a \$31.7 million loss. Partially offsetting these losses was a \$12.1 million gain due to premium tax revenues exceeding the ADEC for the fiscal year ending June 30, 2022. In addition, there was a \$7.4 million gain due to the investment return on an actuarial value basis for the year being more than expected (6.46% vs. 5.75%). There were also small gains and losses in liabilities due to mortality, retirement, and termination actual versus expected experience. Schedule J of this report provides a more detailed breakdown of the gains and losses of the Fund.

Section V – Contributions Payable

1. The Actuarially Determined Employer Contribution (ADEC) consists of a normal contribution and an actuarial accrued liability contribution as determined by actuarial valuation.
2. The normal contribution is calculated as the annual level dollar amount which, if applied for the average new member during the entire period of his anticipated covered service, would be required in addition to the contributions of the member to meet the cost of all benefits payable on his behalf. On the basis of the valuation, the employer normal contribution is determined to be \$19,960,643. This amount includes estimated administrative expenses of \$1,850,000.
3. The actuarial accrued liability contribution on the basis of the Board's funding policy is \$20,381,664.
4. Therefore, the total actuarially determined employer contribution is \$40,342,307.
5. The following table summarizes the employer contributions which were determined by the June 30, 2022 valuation and are recommended for use for fiscal year ending June 30, 2023.

**ACTUARIALLY DETERMINED EMPLOYER CONTRIBUTION (ADEC)
FOR FISCAL YEAR ENDING JUNE 30, 2023**

	CONTRIBUTION
Employer Normal Cost*	\$19,960,643
Actuarial Accrued Liability	<u>20,381,664</u>
Total	\$40,342,307

* Includes an amount for administrative expenses.

Section VI – Accounting Information

Governmental Accounting Standards Board (GASB) has issued Statements No. 67 and 68 which replaced Statements No. 25 and 27 for plan years beginning after June 15, 2013. The information required under the new GASB Statements will be issued in separate reports. The following information is provided for informational purposes only.

1. The following is a distribution of the number of employees by type of membership, as follows:

NUMBER OF ACTIVE AND RETIRED PARTICIPANTS AS OF JUNE 30, 2022

GROUP	NUMBER
Retired participants and beneficiaries currently receiving benefits	6,728
Terminated participants and beneficiaries entitled to benefits but not yet receiving benefits	3,363
Active Participants	<u>13,484</u>
Total	23,575

2. Another such item is the schedule of funding progress as shown below.

SCHEDULE OF FUNDING PROGRESS

Actuarial Valuation Date	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) Entry Age (b)	Unfunded AAL (UAAL) (b - a)	Funded Ratio (a / b)
6/30/2018	\$ 875,918,340	\$ 1,065,924,289	\$ 190,005,949	82.2%
6/30/2019	916,280,503	1,103,481,927	187,201,424	83.0%
6/30/2020	953,972,559	1,144,364,448	190,391,889	83.4%
6/30/2021	1,045,113,412	1,242,368,882	197,255,470	84.1%
6/30/2022	1,098,687,874	1,357,734,522	259,046,648	80.9%

This is not a pay-related plan, so payroll related information has not been shown.

Section VI – Accounting Information

3. The following shows the schedule of employer contributions. Contributions from tax revenue on insurance premiums in protected areas collected by the State continue to exceed what is actuarially determined based on the Board's funding policy.

Year Ending	Actuarially Determined Employer Contribution	Percentage Contributed
June 30, 2017	\$ 28,190,699	127%
June 30, 2018	29,732,350	127%
June 30, 2020	29,915,586	136%
June 30, 2021	31,677,364	137%
June 30, 2022	33,922,653	136%
June 30, 2023	40,342,307	N/A

4. Additional information as of June 30, 2022 follows:

Valuation date	6/30/2022
Actuarial cost method	Entry age normal
Amortization period	Level dollar, closed
Blended amortization period	23.5 years
Asset valuation method	Five-year smoothed market value with 15% corridor
Actuarial assumptions:	
Investment rate of return (includes inflation)	5.75%
Projected salary increases (includes inflation)	N/A
Cost-of-living adjustments	N/A

Section VII – Risk Assessment

Overview

Actuarial Standards of Practice (ASOP) No. 51, issued by the Actuarial Standards Board, provides guidance on assessing and disclosing risks related to pension plan funding. This guidance is binding on all credentialed actuaries practicing in the United States. This standard was issued as final in September 2017 with application to measurement dates on or after November 1, 2018.

The term “risk” frequently has a negative connotation, but from an actuarial perspective, it may be thought of as simply the fact that what actually happens in the real world will not always match what was expected, based on actuarial assumptions. Of course, when actual experience is better than expected, the favorable risk is easily absorbed. The risk of unfavorable experience will likely be unpleasant, and so there is an understandable focus on aspects of risk that are negative.

Risk usually can be reduced or eliminated at some cost. Consumers, for example, buy auto and home insurance to reduce the risk of accidents or catastrophes. Another way to express this concept, however, is that there is generally some reward for assuming risk. Thus, retirement plans invest not just in US Treasury bonds which have almost no risk, but also in equities which are considerably riskier – because they have an expected reward of a higher return that justifies the risk.

Under ASOP 51, the actuary is called on to identify the significant risks to the pension plan and provide information to help those sponsoring and administering the plan understand the implications of these risks. In this section, we identify some of the key risks for the Fund and provide information to help interested parties better understand these risks.

Section VII – Risk Assessment

Sensitivity Measures

Valuations are generally performed with a single set of assumptions that reflects the best estimate of future conditions, in the opinion of the actuary and typically the governing board. Note that under actuarial standards of practice, the set of economic assumptions used for funding must be consistent. To enhance the understanding of the importance of an assumption, a sensitivity test can be performed where the valuation results are recalculated using a different assumption or set of assumptions.

The following tables contains the key measures for the Fund using the valuation assumption for investment return of 5.75%, along with the results if the assumption were 4.75% or 6.75%. In this analysis, only the investment return assumption is changed. Consequently, there may be inconsistencies between the investment return and other economic assumptions such as inflation or payroll increases. In addition, simply because the valuation results under alternative assumptions are shown here, it should not be implied that CMC believes that either assumption (4.75% or 6.75%) would comply with actuarial standards of practice.

(\$ in thousands)

As of June 30, 2022	Current Discount Rate (5.75%)	-1% Discount Rate (4.75%)	+1% Discount Rate (6.75%)
Plan's Normal Cost	\$19,961	\$26,674	\$15,002
Accrued Liability	\$1,357,735	\$1,545,996	\$1,203,604
Unfunded Liability	\$259,047	\$447,308	\$104,916
Funded Ratio	80.9%	71.1%	91.3%

Section VII – Risk Assessment

Mortality Risk

The mortality assumption is a significant assumption for valuation results, second only to the investment assumption in most situations. The Georgia Firefighter's Pension Fund's mortality assumption utilizes a mortality table (with separate rates for males and females, as well as different rates by status) and a projection scale for how the mortality table is expected to improve through time. This approach is the current state of the art in retirement actuarial practice, made possible by the increase in computational power over the past 20 years.

The future, however, is not known, and actual mortality improvements may occur at a faster rate than expected, or at a slower rate than expected (or even decline). Although changes in mortality will affect the benefits paid, this assumption is carefully studied during the regular experience studies that the Fund conducts so that incremental changes can be made to smoothly reflect unfolding experience.

Contribution Risk

The Fund is primarily funded by member contributions and premium tax revenues to the trust fund, together with the earnings on those accumulated contributions. Each year in the valuation, the Actuarially Determined Employer Contribution (ADEC) is determined, based on the Fund's funding policy. The Fund may wish to review contribution risk in the future but with current revenues exceeding ADEC's for the foreseeable future, there is no need to review at this time.

Schedule A – Valuation Balance Sheet

The present and prospective assets and liabilities of the Fund as of June 30, 2022:

<u>ACTUARIAL LIABILITIES</u>		
(1)	Present value of prospective benefits payable on account of present retired members, beneficiaries of deceased members, and terminated members entitled to deferred benefits	\$784,056,990
(2)	Present value of prospective benefits payable on account of present active members	<u>728,974,183</u>
(3)	Total Actuarial Liabilities	<u>\$1,513,031,173</u>
<u>PRESENT AND PROSPECTIVE ASSETS</u>		
(4)	Actuarial value of assets	\$1,098,687,874
(5)	Present value of total future contributions: (3) – (4)	\$414,343,299
(6)	Present value of future normal contributions	155,296,651
(7)	Unfunded actuarial accrued liability contributions: (5) – (6)	<u>259,046,648</u>
(8)	Total Present and Prospective Assets	<u>\$1,513,031,173</u>

Schedule B – Development of the Actuarial Value of Assets

	07/01/2021 to 6/30/2022
(1) Actuarial Value Beginning of Year	\$ 1,045,113,412
(2) Market Value End of Year	\$ 1,055,714,633
(3) Market Value Beginning of Year	\$ 1,202,263,485
(4) Cash Flow	
(a) Contributions	\$ 50,909,501
(b) Benefit Payments	(61,358,353)
(c) Refund of Contributions	(1,147,902)
(d) Administrative Expenses	(1,956,226)
(e) Investment Expenses	<u>(5,143,564)</u>
(f) Net: (4)(a) + (4)(b) + (4)(c) + (4)(d) + (4)(e)	\$ (18,696,543)
(5) Investment Income	
(a) Market Total: (2) – (3) – (4)(f)	\$ (127,852,308)
(b) Assumed Rate	5.75%
(c) Amount for Immediate Recognition: [(3) x (5)(b)] + [(4)(a) + (4)(b) + (4)(c) + (4)(d)] x (5)(b) x 0.5] – (4)(e)	\$ 73,884,066
(d) Amount for Phased-In Recognition: (5)(a) – (5)(c)	\$ (201,736,374)
(6) Phased-In Recognition of Investment Income	
(a) Current Year: 0.20*(5)(d)	\$ (40,347,275)
(b) First Prior Year	46,758,877
(c) Second Prior Year	(10,642,880)
(d) Third Prior Year	(575,011)
(e) Fourth Prior Year	<u>3,193,228</u>
(f) Total Recognized Investment Gain	\$ (1,613,061)
(7) Actuarial Value End of Year: (1) + (4)(f) + (5)(c) + (6)(f)	\$ 1,098,687,874
(8) Actuarial Value Rate of Return	6.46%

Schedule C – Reconciliation of the Market Value of Assets

	For the year ending:	
	June 30, 2021	June 30, 2022
Market Value Beginning of Year	\$ 924,905,112	\$ 1,202,263,485
Additions:		
Member Dues	\$ 4,534,916	\$ 4,649,725
Tax Revenue	43,267,802	46,258,719
Other	1,690	1,057
Total Contributions	\$ 47,804,408	\$ 50,909,501
Net Investment Earnings	288,941,209	(132,995,872)
Total	\$ 336,745,617	\$ (82,086,371)
Disbursements:		
Benefit Payments	\$ (56,855,974)	\$ (61,358,353)
Refunds	(962,948)	(1,147,902)
Administration Expense	(1,568,322)	(1,956,226)
Total	\$ (59,387,244)	\$ (64,462,481)
Change in Net Assets	\$ 277,358,373	\$ (146,548,852)
Market Value End of Year	\$ 1,202,263,485	\$ 1,055,714,633
Net Investment Rate of Return	31.44%	(11.12)%

Schedule D – Statement of Actuarial Assumptions and Methods

The assumptions and methods used in the valuation are based on the results of the experience investigation for the six-year period ending June 30, 2021, which was adopted by the Board September 20, 2022.

VALUATION INTEREST RATE: 5.75% per annum, net of investment expenses, composed of a 2.50% inflation assumption and a 3.25% real rate of investment return assumption.

PRICE INFLATION: 2.50%

RATES OF WITHDRAWAL: Representative values of the assumed annual rates of withdrawal are as follows.

Years of Service		Years of Service	
1	10.00%	8	5.50%
2	10.00	9	5.00
3	9.00	10	4.25
4	7.50	11	4.00
5	7.00	12	3.50
6	6.50	13+	3.25
7	6.00		

RATES OF RETIREMENT: Representative values of the assumed annual rates of service retirement are as follows.

Age		Age	
50	7.5%	58	20.0%
51	8.0	59	20.0
52	8.5	60	22.0
53	9.0	61	27.0
54	18.5	62	30.0
55	28.0	63	30.0
56	19.0	64	35.0
57	18.0	65	100.0

Schedule D – Statement of Actuarial Assumptions and Methods

RATES OF DEATH BEFORE RETIREMENT: The Pub-2010 Public Safety Headcount Weighted Below Median Table, with no adjustments, projected generationally with the MP-2021 scale is used for both males and females while in active service. Representative values of the assumed annual rates of mortality while in active service are as follows:

Annual Rates of Death*					
Age	Males	Females	Age	Males	Females
20	0.0460%	0.0180%	45	0.1160%	0.0950%
25	0.0540	0.0270	50	0.1680	0.1310
30	0.0600	0.0370	55	0.2470	0.1820
35	0.0680	0.0500	60	0.3790	0.2510
40	0.0850	0.0690	65	0.6050	0.3470

* Base mortality rates as of 2010 before application of the improvement scale

RATES OF DEATH AFTER RETIREMENT: The Pub-2010 Family of Tables, with no adjustments, projected generationally with the MP-2021 scale are used for post-retirement mortality assumptions as follows:

Participant Type	Base Mortality Table
Service Retirements	PubS.H-2010 Healthy Retiree, Below Median
Disability Retirements	PubS.H-2010 Disabled Retiree
Beneficiaries	PubS.H-2010 Contingent Survivor, Below Median

Schedule D – Statement of Actuarial Assumptions and Methods

Representative values of the assumed annual rates of mortality are as follows:

Age	Annual Rates of Death*					
	Service Retirement		Disability Retirement		Beneficiaries	
	Males	Females	Males	Females	Males	Females
50	0.4410%	0.1950%	0.4550%	0.3170%	0.9110%	0.5960%
55	0.5470	0.3260	0.6440	0.5450	1.0470	0.7130
60	0.8180	0.5450	0.9380	0.8730	1.2780	0.9210
65	1.2010	0.9110	1.4150	1.2450	1.6790	1.2870
70	1.9780	1.5220	2.2200	1.8920	2.4900	1.8180
75	3.5060	2.5440	3.6340	3.2290	3.8360	2.7320
80	6.2020	4.2530	6.0440	5.3230	5.9520	4.2990
85	10.9510	7.3240	10.3130	8.1390	9.5080	7.1420
90	17.5150	12.6470	16.9040	12.6020	15.1110	12.2300

* Base mortality rates as of 2010 before application of the improvement scale

ADMINISTRATIVE EXPENSES: Estimated to be \$1,850,000 per year.

PERCENT MARRIED: 80% of active members are assumed to be married with the male three years older than his spouse.

COST OF LIVING ASSUMPTION: No future COLA's are assumed.

ACTUARIAL VALUE OF ASSETS METHOD: Actuarial value, as developed in Schedule B. Each year the expected return is determined based on the investment return assumption applied to actuarial value. This expected return reflects the timing of contributions and benefit payments during the year. This return is compared to the actual return for the year based on market value. The difference is considered a gain or loss and is amortized over five years.

VALUATION METHOD: Entry age normal cost method.

Schedule E – Actuarial Cost Method

1. The valuation is prepared on the projected benefit basis, under which the present value, at the interest rate assumed to be earned in the future (currently 5.75%), of each member's expected benefits at retirement or death is determined, based on age, service and sex. The calculations take into account the probability of a member's death or termination of employment prior to becoming eligible for a benefit, as well as the possibility of his terminating with a service, disability or survivor's benefit. The present value of the expected benefits payable on account of the active members is added to the present value of the expected future payments to retired members and beneficiaries to obtain the present value of all expected benefits payable from the Fund on account of the present group of members and beneficiaries.
2. The employer contributions required to support the benefits of the Fund are determined following a level funding approach and consist of a normal contribution and an actuarial accrued liability contribution.
3. The normal contribution is determined using the entry age actuarial cost method. Under this method, a calculation is made to determine the level dollar which, if applied for the average member during the entire period of his anticipated covered service, would be required in addition to the contributions of the member to meet the cost of all benefits payable on his behalf.
4. The unfunded actuarial accrued liability is determined by subtracting the present value of prospective employer normal contributions and member contributions, together with the current actuarial value of assets held, from the present value of expected benefits to be paid from the Fund.

Schedule F – Summary of Principal Plan Provisions

Current Plan Provisions: The plan provisions and contribution revenue are established under Chapter 7 of Title 47 of the Official Code of Georgia. The Chapter has established a five-member Board of Trustees to administer the Fund. The Georgia Legislature has sole authority to change plan provisions, except that the Fund's Trustees may approve ad hoc cost-of-living adjustments each six months not exceeding 1½% per increase. The Georgia Legislature also determines sources of revenues to the Fund from the State and from Members. Employers are not required to make contributions to this fund.

Effective Date: 1955

Most Recent Amendment Effective Date: July 1, 2022.

Type of Plan: A defined benefit, public employee retirement system funded by Member contributions and tax revenues on insurance premiums in protected areas.

Eligibility: Any person employed as a firefighter or enrolled as a volunteer firefighter making required monthly dues. Members of Peace Officers' Annuity and Benefit Fund are excluded. Regular employees of the fund are eligible.

Credited Service: All service as a Member of the fund rendered while a firefighter or volunteer firefighter excluding years for volunteer firefighters who do not meet attendance, meeting or drill requirements and excluding any leave of absence time. The Board may calculate Credited Service on a monthly basis.

Schedule F – Summary of Principal Plan Provisions

Normal Retirement Date: Full benefits paid at age 55 with at least 25 years of service. Reduced benefits paid if Member has at least 15 years of service.

Early Retirement Date: Age 50 with at least 15 years of service.

Retirement Benefit at Normal Retirement Date: A monthly retirement income increased 2% for each complete year of service over 25. If credited service is less than 25, the \$987 per month is reduced by the ratio of credited service divided by 25 years. The \$987 benefit is derived as follows:

	<u>Change</u>	<u>Total Benefit</u>
Benefit under Code Sec. 47-7-102(3) effective 7/1/1990	= \$570	\$570
6% Increase to offset State Income Tax under Code Sec. 47-1-30	= 34	604
3% COLA adjustment on 8/1/1993	= 18	622
1½% COLA adjustment on 1/1/1994	= 9	631
1½% COLA adjustment on 7/1/1994	= 9	640
1½% COLA adjustment on 1/1/1995	= 10	650
1½% COLA adjustment on 7/1/1995	= 10	660
1½% COLA adjustment on 1/1/1996	= 10	670
1½% COLA adjustment on 7/1/1996	= 10	680
1½% COLA adjustment on 1/1/1997	= 10	690
1½% COLA adjustment on 7/1/1997	= 10	700
1½% COLA adjustment on 7/1/1998	= 10	710
1½% COLA adjustment on 7/1/1999	= 11	721
1½% COLA adjustment on 1/1/2000	= 11	732
1½% COLA adjustment on 7/1/2000	= 11	743
1½% COLA adjustment on 7/1/2001	= 11	754
1½% COLA adjustment on 7/1/2003	= 11	765
1½% COLA adjustment on 1/1/2004	= 11	776
1½% COLA adjustment on 7/1/2004	= 12	788
1½% COLA adjustment on 1/1/2005	= 12	800
1½% COLA adjustment on 7/1/2005	= 12	812
1½% COLA adjustment on 1/1/2006	= 12	824
1½% COLA adjustment on 7/1/2006	= 12	836
1½% COLA adjustment on 1/1/2007	= 13	849
1½% COLA adjustment on 7/1/2007	= 13	862
1½% COLA adjustment on 1/1/2008	= 13	875
¾% COLA adjustment on 7/1/2008	= 7	882
1½% COLA adjustment on 7/1/2016	= 13	895
1% COLA adjustment on 7/1/2017	= 9	904
1% COLA adjustment on 1/1/2018	= 9	913
1% COLA adjustment on 7/1/2018	= 9	922
1% COLA adjustment on 1/1/2019	= 9	931
1% COLA adjustment on 1/1/2020	= 9	940

Schedule F – Summary of Principal Plan Provisions

1% COLA adjustment on 1/1/2021	=	9	949
1½% COLA adjustment on 7/1/2021	=	14	963
1½% COLA adjustment on 1/1/2022	=	14	977
1% COLA adjustment on 7/1/2022	=	10	987
Total benefit amount			\$987

Retirement Benefit at Early Retirement Date: For retirement between ages 50 and 55, the benefit is reduced by 6% for each year which early retirement precedes age 55.

Disability: There is no longer a disability benefit.

Vesting: After completion of 15 years of service, a participant is 100% vested. If termination occurs prior to vesting, total member contributions are refunded, less 5%.

Vesting Benefit: The accrued benefit deferred to a minimum age 50.

Death Benefits: Prior to vesting, death benefit equals \$10,000.00. After vesting, the death benefit is as prescribed by the Code. A Member with 15 years of creditable service has coverage for his or her spouse in the event the Member dies prior to commencing benefits. The coverage percentage is 100% of what the Member would have received under a joint and 100% survivor option and is payable when the Member would have become age 55. If the Member is not married, his or her beneficiary will receive benefits under the ten-year certain option. The Member's benefit is not reduced to reflect the cost of this option (other than the normal reduction for a joint and survivor annuity).

Member Contributions (Dues): \$25 per month. If Member terminates after 25 years of service but is not age 55, dues cease.

Schedule F – Summary of Principal Plan Provisions

Normal Form of Payment: Life annuity.

Optional Forms of Payment: After retirement, the following options are available in exchange for an actuarial reduction in the Member's benefit.

- A. Joint and Survivor Option at 100%, 75%, 66²/₃%, or 50 percent continuation
- B. Ten Years Certain and Life Option

If a Joint and Survivor is elected and the spouse predeceases or divorces the Member, the benefit is increased (or "pops-up") to the amount that would have been payable if the Joint and Survivor Option had not been elected. There is no charge to the Member for the pop-up provision.

Reduction: Benefits can be reduced if funds are insufficient.

Postemployment Healthcare Benefits: None.

Cost-of-Living Allowance (COLA): There is no automatic provision. The Board of Trustees can make ad hoc increases up to 1 ½% every six months.

Schedule G – Board Funding Policy

The purpose of this Funding Policy is to state the overall objectives for the Georgia Firefighters' Pension Fund (Plan), the benchmarks that will be used to measure progress in achieving those goals, and the methods and assumptions that will be employed to develop the benchmarks. It is the intent of the Board that the Funding Policy outlined herein will remain unchanged until the objectives below are met.

I. Funding Objectives

The goal in requiring state and member contributions to the Plan is to accumulate sufficient assets during a member's employment to fully finance the benefits the member is expected to receive throughout retirement. In meeting this objective, the Plan will strive to meet the following funding objectives:

- To maintain a stable or increasing funded ratio (ratio of actuarial value of assets to actuarial accrued liabilities) that reflects a trend of improved actuarial condition. The long-term objective is to obtain a 100% funded ratio over a reasonable period of future years.
- To maintain adequate asset levels to finance the benefits promised to members and monitor the future demand for liquidity.
- If required contribution amounts are larger than actual contributions or the funding ratio falls below 80%, than any benefit improvements should be funded through increases in contribution amounts.

II. Measures of Funding Progress

To track progress in achieving the Plan's funding objectives, the following measures will be determined annually as of the actuarial valuation date (with due recognition that a single year's results may not be indicative of long-term trends):

- **Funded ratio** – The funded ratio, defined as the actuarial value of assets divided by the actuarial accrued liability, should increase over time, before adjustments for changes in benefits, actuarial methods, and/or actuarial adjustments.
- **Unfunded Actuarial Accrued Liability (UAAL)**
 - **Transitional UAAL** – The UAAL established as of the initial valuation date of June 30, 2014 for which this funding policy was adopted shall be known as the Transitional UAAL.
 - **New Incremental UAAL** – Each subsequent valuation will produce a New Incremental UAAL consisting of all benefit changes, assumption and method changes and experience gains and/or losses that have occurred since the previous valuations.
- **UAAL Amortization Period**
 - The Transitional UAAL and each New Incremental UAAL from 2015 through 2021 will be amortized over a closed 23-year period as of the June 30, 2022 valuation.
 - Each New Incremental UAAL on or after the June 30, 2022 valuation shall be amortized over a closed 25-year period beginning with the year it is incurred.
 - The amortization of UAAL will be developed using the level dollar methodology.

Schedule G – Board Funding Policy

- **Contributions**

- Contributions to the Plan will continue to come from tax revenues on insurance premiums in protected areas collected by the state.
- In each valuation, the actuary will calculate a minimum required annual contribution amount based on the methods and assumptions outlined in this funding policy. The required state contribution amount will be determined as the summation of the employer normal cost, an estimated administrative expense amount, and the amortization amount for the Transitional UAAL and the individual amortization amount for each of the New Incremental UAAL bases.
- In no event shall the required contribution amount be less than the employer normal cost plus the estimated administrative expense amount.
- The valuation methodology, including the amortization of the Unfunded Actuarial Accrued Liability (UAAL), would be expected to maintain reasonably stable contribution amounts.

III. Methods and Assumptions

The annual actuarial valuations providing the measures to assess funding progress will utilize the actuarial methods and assumptions last adopted by the Board based upon the advice and recommendations of the actuary. These include the following primary methods and assumptions:

- The actuarial cost method used to develop the benchmarks will be the Entry Age Normal (EAN) actuarial cost method.
- The long-term annual investment rate of return assumption will be 5.75% net of investment expenses.
- The actuarial value of assets will be determined by recognizing the annual differences between actual and expected market value of assets over a five-year period.

The minimum required contribution amounts determined in an annual actuarial valuation will be at least sufficient to satisfy the annual normal cost of the Plan, the estimated administrative expense amount, and amortize the UAAL as a level dollar amount over a period not to exceed 25 years. However, in no event, shall the contribution amount be less than the employer normal cost plus the estimated administrative expense amount.

The actuary shall conduct an investigation into the Plan's experience at least every six years and utilize the results of the investigation to form the basis for recommended assumptions and methods. Any changes to the recommended assumptions and methods that are approved by the Board will be reflected in this Policy.

IV. Funding Policy Progress

The Board will periodically have actuarial projections of the valuation results performed to assess the current and expected future progress towards the overall funding goals of the Plan. These periodic projections will provide the expected valuation results over at least a 30-year period. The projected measures of funding progress and the recent historical trend provided in valuations will provide important information for the Board's assessment of the Plan's funding progress.

Adopted: September 20, 2022

Schedule H – Amortization of UAAL

2014 TRANSITIONAL UAAL

Valuation Date	Amortization Period	Balance of Transitional UAAL	Annual Amortization Payment
